

## Printable Hestra Sizing Chart

- Make sure the template on the bottom lines up with a credit card, id, or ski pass. Some printers like to shrink pages, if the outline doesn't line up to the card you could get the wrong hand size. A little wiggle room is fine.
- Line up the heel of your hand with the line on the bottom right. Your size is measured by the distance between your wrist and the tip of your middle finger
- These sizes are specifically for Hestra gloves only
